AUTHORIZED **TICO** DEALER

Northeast Georgia's TICO dealer for sales, service and warranty of top-quality American-made terminal tractors

As Northeast Georgia's proud authorized dealer of TICO terminal tractors, Turbo offers a fleet of quality Pro-Spotter tractors for sale or lease. Like Turbo, TICO is an all-American company, with all manufacturing – from parts to labor – done in the United States. There's a good reason TICO is one of the fastest-growing manufacturers of terminal tractors: It is the largest fleet owner and operator in North America with more than 1,400 tractors operating, every day.

TICO's unique position as the only terminal tractor manufacturer that actually operates and maintains its own equipment means the company understands what it takes for terminal tractors to perform in the toughest of conditions, day after day. Based in the port city of Savannah, Georgia, TICO brings to the market unparalleled durability, maintainability and driver benefits in the Pro-Spotter tractor. Solid, durable and competitively priced, Pro-Spotter tractors are quality construction with galvanized bodies and frames – not pieced together.

The Pro-Spotter is the result of TICO's continuous innovation and unflinching dedication to creating the ideal tractor for its own fleet, and yours. That's real world research and development for real world advantages and benefits.

In addition to selling both new and used TICO terminal tractors, Turbo is a certified mechanic for maintenance and repair of all brands of terminal tractors. Turbo also refurbishes terminal tractors for sale or lease, and provides warranty protection on all TICO terminal tractors.

TICO

Maximum Up-Time

- Cost-effective, standard features like larger 65-gallon fuel tanks
- Standard automatic open-close (air-operated) rear door for simple and convenient operation

Fast, Simple Maintenance

- Vehicles built on modular platforms to ensure most systems/parts can be removed and replaced in minutes
- Designed to be maintained and repaired by real world maintenance teams like Turbo

Value

- Maximizing asset utilization & tractor performance
- Generating low life-cycle costs
- Providing production customization
