TERMINAL TRACTORS & TRAILERS

## Sales and Leasing for all Brands of Terminal Tractors

Terminal tractors are the versatile workhorses at warehouses, distribution centers and ports that maneuver freight throughout busy storage yards. Their toughness is touted with nicknames ranging from Yard Dogs and Spotters to Mules and Shaggers. But when it comes to the purchase or leasing of these vehicles, Turbo is the only name that you need to remember.

## An Expansive Campus and Facility

Based less than an hour north of Atlanta in Gainesville, Ga., Turbo Sales & Leasing operates on a 65-acre campus with plenty of room for display and storage of a wide assortment of terminal tractors and truck trailers. Our offices are located within a 48,000 square-foot-facility that includes 20 bays for maintenance and repair work.

We operate next door to our two sister companies: Syfan Logistics and Syfan Transport. This relationship allows us the extra advantage of utilizing their nationwide transport services to deliver leased or purchased vehicles to customers on a timely basis.

# THE ONE NAME TO REMEMBER FOR TERMINAL TRACTORS.

## A Longtime Tradition in the Transportation Industry

Our company was founded in 2006 but we have been around for well over four decades in the trucking industry. We originally started out as a truck repair shop, a foundation that continues to serve us well in the repair and maintenance of our customers' leased terminal tractor fleets.

From our roots in Northeast Georgia, we have expanded into a nationwide company serving markets across the country. However, as a family-owned operation, we take pride in our focus on personal service and Christian business ethics. CEO Jim Syfan and his family are well-respected as an "American tradition in transportation."

## Our Experience

Our 50-member team includes service technicians certified in Automotive Service Excellence (ASE), each with an average of more than 10 years of experience. ASE is the top certification awarded by the National Institute for Automotive Service Excellence. We are also Cummins-certified -- the industry's highest standard in engine repair and service work.

**"Turbo's service record and their New Every 2™ leasing program are phenomenal in keeping our operations running non-stop."**

*ASE is the top certification awarded by the National Institute for Automotive Service Excellence.*

# TERMINAL TRACTOR SALES & LEASING PROGRAMS

---

**With an inventory of nearly 1,000 terminal tractors on-site or under lease, Turbo has the capacity to support your storage yard operations.**

---

## Terminal Tractors – Our Specialty in the Warehousing Industry

Turbo Sales & Leasing supports the fast-paced demands of today's warehousing industry with one of the largest inventories of terminal tractors for sale or lease.

### Sales

Our vast inventory contains a diverse selection of pre-owned terminal tractors for sale – including quality brands such as TICO, Ottawa, and

Capacity. We also sell used truck trailers ranging from refrigerator containers (reefers) to dry vans and flat beds – all of which can be purchased through Turbo's sales financing programs.

### Leasing

Custom leasing programs are at the heart of our company focus. Whether leasing one terminal tractor or an entire fleet, you are able to keep your operations running in top shape.

Our most popular leasing program is our **New Every 2™ plan** – which allows you to replace each terminal tractor in your fleet with a new one every two years! Since introducing this concept to the industry several years ago, many competitors have tried to imitate us. But no one matches our success in minimizing downtime with maximum uptime. We accomplish this through our vast inventory backed by a superior maintenance program.

## GO-TURBO – Our 24-hour maintenance and repair app

Preventative maintenance and back-up terminal tractors are two key aspects of our leasing programs. We equip each of our leased tractors with Geotab GPS tracking devices to remotely monitor and inform us of potential maintenance issues before they happen.

---

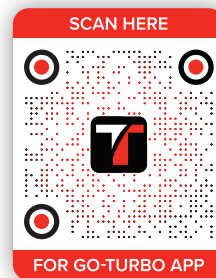

**Our exclusive  
GO-TURBO app is a  
fleet-maintenance  
tool that streamlines  
communications  
and response time.**

---

## GO-TURBO App

Going the extra mile in 2022, we rolled out our exclusive GO-TURBO app – operational on Apple and Android smartphones – to help our fleet customers stay on top of critical repair issues. This convenient tool provides direct communication with our team – no matter what time or day.

With GO-TURBO, you can:

- ▶ Keep track of every vehicle in your fleet
- ▶ Point, click to identify vehicle with repair need
- ▶ Communicate directly to maintenance center
- ▶ Get faster repair order and response via app
- ▶ Obtain quick diagnosis with initial repair advice
- ▶ Dispatch replacement vehicles to avoid downtime

## **Pre-Owned Terminal Tractor Rentals**

In addition to leased new vehicles, Turbo provides additional flexibility with short- and long-term rentals of pre-owned TICO Pro-Spotter terminal tractors and other quality brands.

## **Trailer Leasing – New and Pre-Owned**

We also offer rentals for a wide assortment of quality reefers, dry vans, and flat bed trailers. Short and long-term rental arrangements are available.

For all rental inquiries, contact our national sales team.
